

BEZHAN KALICHAVA

Full-stack Developer | Master's in IT Management

I'm a hard worker and quick learner, always looking for challenges and opportunities to improve.

Main Skills: React, Vue.js, Next.js, Node.js, TypeScript, MongoDB, Web3

WORK EXPERIENCE

Flat Rock Technology

Period: 2025 - now

Full-Stack Developer - Currently working on MikMak, one of the largest interactive e-commerce platforms in the world, using **Vue.js** and **Node.js** with a widget-based and microservice architecture:

Working on several repositories, both frontend and backend, alongside international professionals. My main responsibilities include improving performance, debugging code, and adding new functionality through a CI/CD pipeline.

Aviafy - CRM Platform (My Startup)

Period: 2023 - 2024

Founder & CEO & Full-Stack Developer - Developed and launched Aviafy from scratch, now fully in production, and operating successfully.

- **Authorization & Security:** Implemented **RBAC** and **JWT** Bearer authentication for secure user access and API security.
- **Social Media Integration:** Integrated social media messaging with **WebSocket** for real-time communication.
- **AI Assistant:** integrated with Facebook, Telegram, and Instagram to automate interactions and customer support.
- **Performance Optimization:** Optimized the database with **indexing** and used **caching** to improve performance and reduce load.

AONE: Crypto Trading Platform Startup

Period: 2022 - 2024

Full-Stack Developer - Played a key role in building a crypto market platform from scratch, working on both the front and back ends.

- Led a team, reviewing their work and ensuring code quality.
- Implemented user registration with **smart contracts** and staking logic.
- Developed a system for buying crypto using **Web3** and **Wagmi**.
- Created a custom UI library for the platform as an **npm** package.
- Built a modular **Node.js** backend for services like accounts and transactions.
- Developed an admin page for platform management.
- Participated in **Agile** processes, including sprint planning and task splitting.
- Gained experience in full-stack development, **blockchain** technology, modular system design, and **deployment**.

Hypercubic Innovation center

Period: 2020 - 2022

Full-Stack Developer - Starting as a junior, I had the opportunity to work on several interesting projects using technologies such as **HTML**, **CSS**, **React**, **JavaScript**, and **NodeJS**.

Managerial Experience

Period: 2015 - 2020

Before moving to IT, I gained managerial experience in the service industry and as an entrepreneur, managing recruitment, training, and inventory. This enhanced my leadership and team management skills in IT.
