

BEZHAN KALICHAVA

Full-stack Javascript developer

ABOUT ME

I am a full-stack developer specializing in dynamic websites using **React** and **Next.js**, with backend support from **Node.js**. I've delved into blockchain technology, learning about smart contract development and decentralized applications. My familiarity with **Web3** allows me to interact effectively with blockchains. I am committed to continuous learning, always seeking to expand my skills, and open to new professional opportunities.

WORK EXPERIENCE

Employment Period: 2024 - now

Owner, Manager, Full-Stack Developer - Startup Project "Aviafy"

- developed, and launched Aviafy from scratch using the MERN stack, now fully in production, serving tour agencies and operators.
- Developed an integrated CRM for managing customer data, bookings, and payments, with automated invoicing and order tracking.
- Implemented AI-powered assistants for Facebook, Instagram, and Telegram, improving client communication and service.
- Improved how agencies operate so they can focus on providing great travel experiences

Employment Period: 2022 - 2024

Middle Software Developer - Startup Project "AONE"

Overview: Played a key role in building a new crypto market platform from scratch. Worked on both the front and back ends.

Key Responsibilities:

- **Implemented** user registration using smart contracts with staking logic.
- **Developed** a system for buying cryptocurrencies using web3 to interact with the blockchain.
- **Built** a custom UI library as an npm package for front-end development.
- **Built** a modular backend with Node.js, organizing services like accounts and transactions into separate modules.
- **Developed** a separate admin page for managing the platform.
- **Participated** in Agile processes like sprint planning and task splitting.
- **Suggested** and implemented improvements to make the platform better.

Achievements:

- Successfully launched the a1.gold platform, providing users with a secure and efficient way to trade and stake cryptocurrencies.
- Gained valuable experience in full-stack development, blockchain technology, and building modular systems

Employment Period: 2021 - 2022

Junior Software Developer - Hypercubic Innovation center

Developed and maintained web apps with React, Next.js, Node.js, and MongoDB. Utilized Git for version control, contributed to code reviews, and collaborated closely with senior developers. Built RESTful APIs, integrated third-party services, and wrote unit/integration tests with Jest and Mocha. Actively engaged in Agile processes, including daily stand-ups and sprint planning.

Employment Period: 2015 - 2020

Managerial Experience

Before I transitioned into IT, I gained valuable managerial experience in business. I began as a manager in the service industry and Transitioned into entrepreneurship; I established a company where I managed all facets, including staff recruitment, training, and inventory maintenance. This experience equips me with strong leadership and team management skills, which I apply in the IT industry.
